## CAREER OBJECTIVE

---

Motivated Cloud & DevOps Engineer with hands-on experience in AWS, Linux, monitoring, and automation. Skilled in handling production systems, troubleshooting incidents, and maintaining system uptime. Passionate about building reliable and secure cloud environments while ensuring smooth operations and customer satisfaction.

## KEY SKILLS

---

**Programming Languages:** Python | Golang | Bash

**Cloud & Devops:** AWS | GCP | Docker | Kubernetes | Ansible | Terraform | AWS cloudformation | Jenkins | CI/CD | Github Actions | Bitbucket

**Database Technologies:** MySQL | MongoDB

**Monitoring:** AWS CloudWatch | CRON Jobs | Log Analysis | Troubleshooting | Splunk (logs)

**Machine Learning & AI:** Machine Learning | ChatGPT | Cursor

**Networking & Infrastructure:** Linux Administration | TCP/IP | SSH | HTTP/HTTPS | SSL | Firewalls

## WORK EXPERIENCE

---

**ORCAN LITTLE SYSTEMS** | Faridabad

Oct '24 - Present

*Associate Software Engineer*

- Managed production systems and optimized **AWS-based infrastructure for high reliability**.
- Automated CloudWatch alarms, metrics, and log monitoring for databases and applications.
- Developed **Python scripts for incident detection** and auto-recovery workflows.
- Performed **root cause analysis for recurring issues** and documented in operational runbooks.
- Supported deployment monitoring and integration with **Jenkins CI/CD pipelines**.
- Improved uptime and system performance through **proactive monitoring and tuning**.

**IZOOTO(Dataability Pvt. Ltd.)** | Noida

Dec '23 - Aug '24

*Software Engineering Intern*

- Deployed and managed containerized applications using **Docker and Kubernetes**.
- Automated deployments and monitoring with AWS cloudwatch , cutting downtime by 25%.
- Configured **CI/CD pipelines using Jenkins** to streamline production releases.
- Assisted in **log-based alerting** and failure analysis using **AWS CloudWatch** and custom scripts
- Managed cloud-based environments, handled incident response, and performed **log analysis** for real-time issues.
- Benchmarked **cloud databases (MongoDB, Cassandra)** for scalability and performance tuning.

## KEY PROJECTS

---

**AWS Lambda Image Metadata Extractor (Serverless App) - AWS | Lambda | DynamoDB | S3 | SNS**

- Designed and implemented an event-driven serverless application using **AWS Lambda triggered by S3 events to extract and manage image metadata**
- [Project link](#)

**DevOps Automation Project – Terraform | Ansible | Jenkins | AWS**

- This project automates the creation of EC2 infrastructure, Ansible-based configuration management, and Jenkins CI pipeline setup on AWS using Terraform, Ansible, and Jenkins.
- [Project link](#)

## CERTIFICATIONS

---

- Successfully completed **Cloud & DevOps Bootcamp Certification** from Intellipaat, gaining in-depth knowledge of cloud computing and DevOps practice

## EDUCATION

---

**State Institute of Engineering and Technology,  
Kurukshetra University**

Aug '19 - Jun '23

*Bachelor of Technology(Computer Engineering), CGPA: 8.07/10*
